Tighten all screws, bolts, and nuts to their specified torque values. Refer to the Service Manual for the torque values of the removed parts.

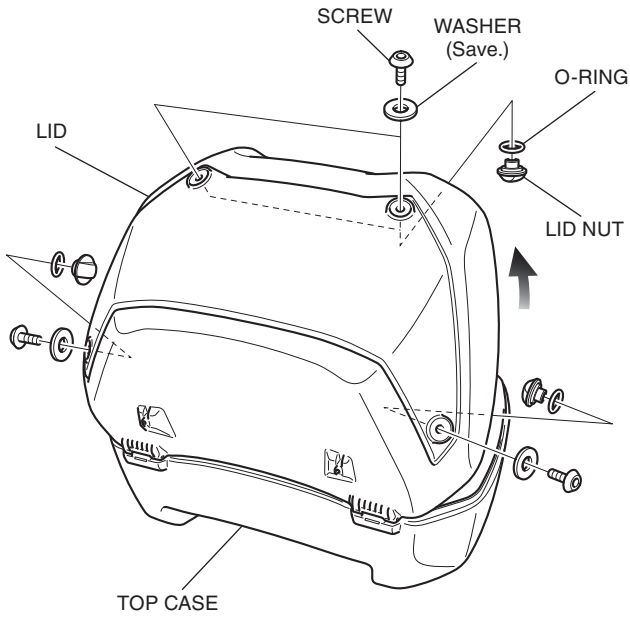

Item	N·m	kgf·m	lbf·ft
Screw	4.2	0.4	3.1

INSTALLATION

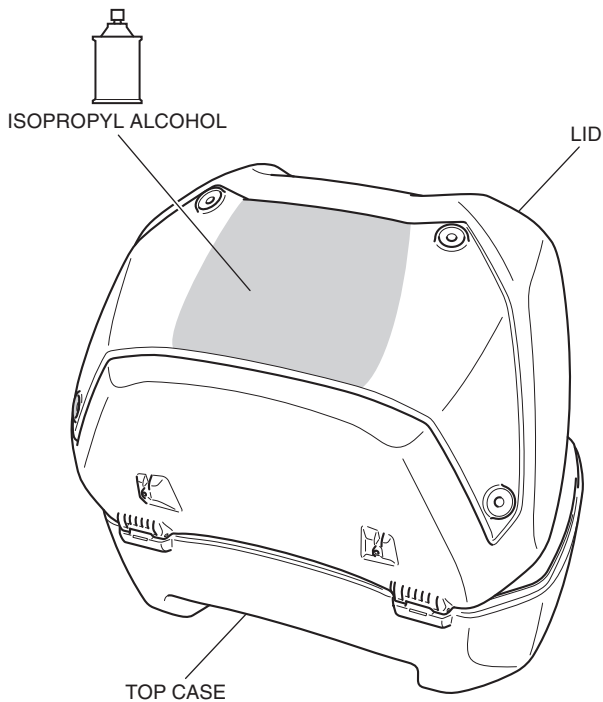

NOTE:

- Heat the bonding surfaces with a hair dryer if the ambient air temperature is below 70°F (21°C).
- The adhesive reaches full strength in 72 hours. Wait at least 24 hours before riding your motorcycle.

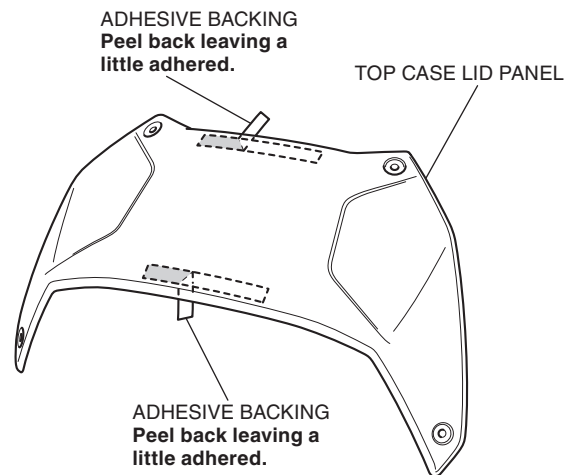

1. Open the lid, then remove the parts as shown.

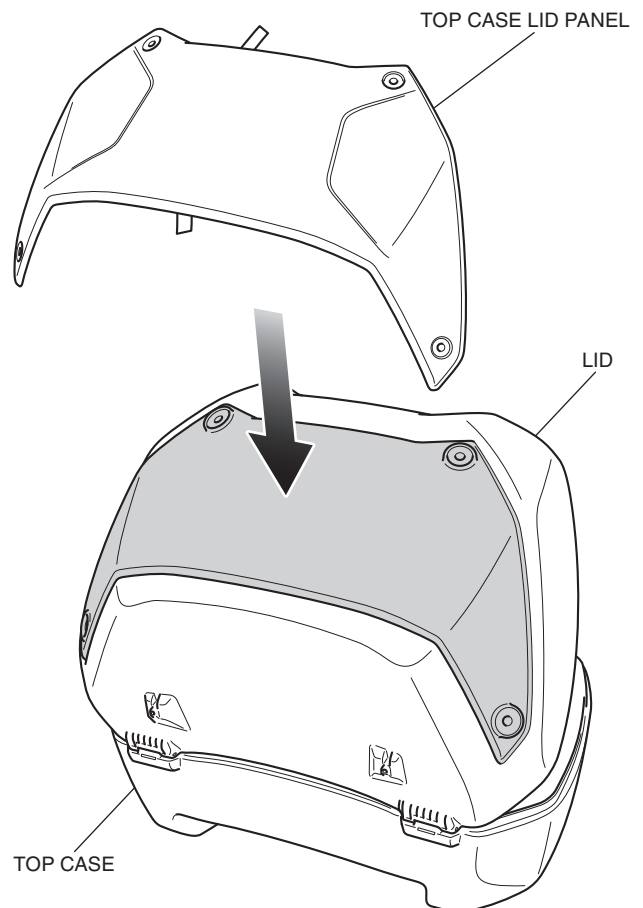

2. To maintain the adhesive strength of the double-sided tape, be sure to clean the surface of the indicated area with isopropyl alcohol.

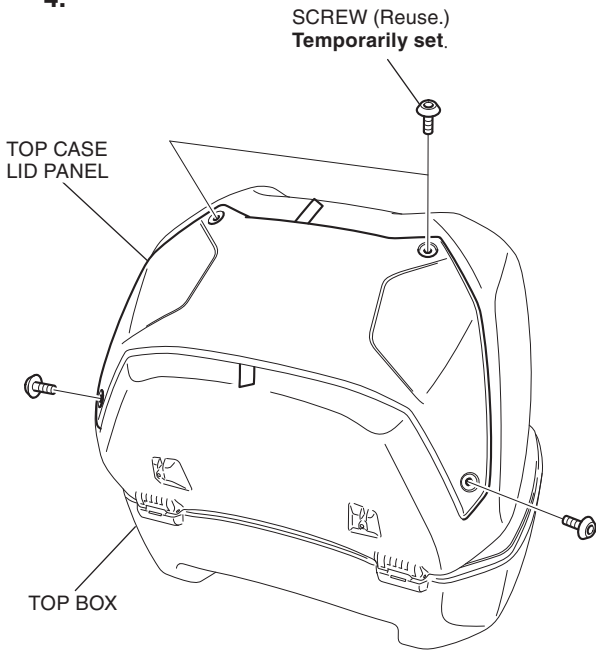

3. Peel off the adhesive backings on the rear of the top case lid panel as shown.

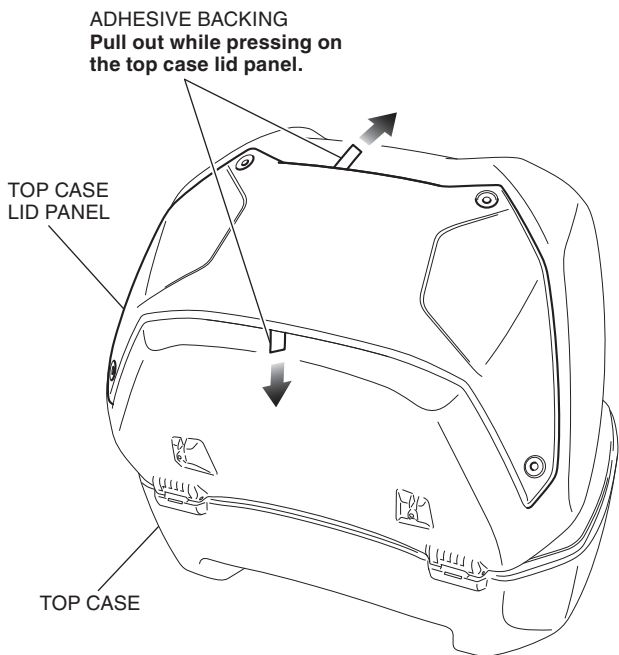

4. Attach the top case lid panel as shown.
 - Align the top case lid panel with the shape of the lid.

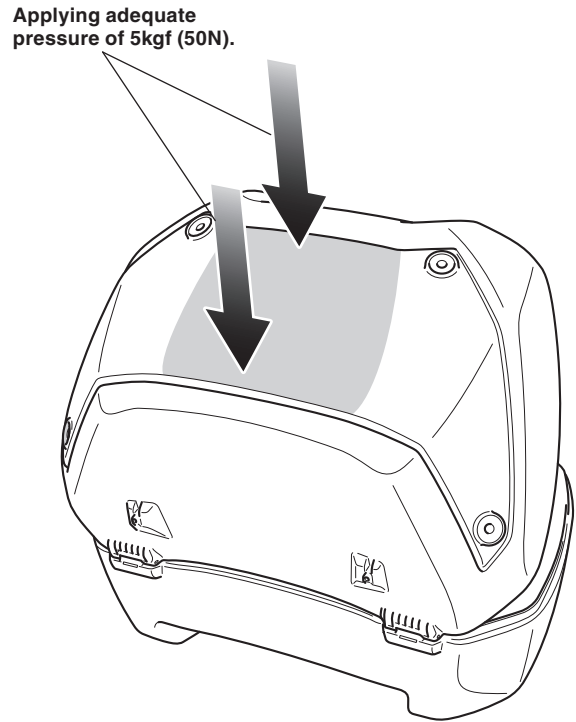

5. Temporarily set the screw and check that there is no misalignment.
 - If there is a misalignment, start over from step 4.

6. Remove the adhesive backings while pressing on the top case lid panel firmly with the palm.

7. Applying adequate pressure of 5kgf (50N) to the attached top case lid panel.
 - Make sure to crimp with a force of 5 kgf (50 N).

8. Leave the top case lid panels for 10 minutes to stabilize the fitting of the adhesive surface.

9. Install the parts as shown.
