

- Your motorcycle is capable of receiving SiriusXM[®] Radio anywhere in the United States, except Hawaii, Alaska and Puerto Rico. SiriusXM[®] is a registered trade mark of SiriusXM[®] Radio, Inc.
- SiriusXM[®] Radio receives signals from two satellites to produce clear, high-quality digital reception. It offers many channels in several categories. Along with a large selection of different types of music, SiriusXM[®] Radio also allows you to view channel and category selections in the audio display.

RECEIVING SiriusXM® RADIO SERVICE

- If your SiriusXM® Radio service has expired or you purchased your motorcycle from a previous owner, you can listen to a sampling of the broadcasts available on SiriusXM® Radio. With the ignition switch in the ACCESSORY or the ON position, press the SOURCE switch to select to [SXM]. A variety of music types and styles will play.
- If you decide to purchase SiriusXM[®] Radio service, contact SiriusXM[®] Radio at *www.siriusxm. com*, or telephone the number on the subscription display. You will need to give them your Radio ID number, which may be found on SiriusXM[®] Channel 0, and your credit card number.
- To get your Radio ID number, select the General Setting/System information/SiriusXM Subscription or Navigation Menu/Information/SiriusXM Subscription.

	Subscribed Unsubscribed Unsubscribed	SiriusXM satellite radio: SiriusXM traffic: SiriusXM weather:	
— RADIO ID NUMBER	Call	SiriusXM ID:ABCD1234 - Call(888)539-7474	

- Contact SiriusXM[®] Radio at *www.siriusxm.com*, or telephone the number on the subscription display.
- After you've registered with SiriusXM[®] Radio, keep your audio system in the SiriusXM[®] Radio mode while you wait for activation. This should take about 30 minutes.

• While waiting for activation, make sure your vehicle remains in an open area with good reception. SiriusXM® Radio will continue to send an activation signal to your motorcycle for at least 3 hours from the activation request. If you miss that window, simply log onto *www.siriusxm.com* refresh with your Radio ID and follow the steps to refresh the signal.

• The SiriusXM® satellites are in orbit over the equator; therefore, objects south of the vehicle may cause satellite reception interruptions. To help compensate for this, ground-based repeaters are placed in major metropolitan areas.

- Satellite signals are more likely to be blocked by tall buildings and mountains the farther north you travel from the equator. Carrying large items on a travel trunk can also block the signal.
- Depending on where you ride, you may experience reception problems. Interference can be caused by any of these conditions:
 - Riding on the north side of an east/west mountain road.
 - Riding on the north side of a large commercial truck on an east/west road.
 - Riding in tunnels.
 - Riding on a road beside a vertical wall, steep cliff, or hill to the south of you.
 - Riding on the lower level of a multi-tiered road.
 - Riding on a single-lane road alongside dense trees taller than 50 ft. (15 m) to the south of you.
- There may be other geographic situations, parking conditions, and also installing metallic or metalized accessories near the windscreen could affect SiriusXM® Radio reception.
- As required by the FCC:

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

DISPLAY MESSAGES

Display Message	Status
Check Tuner	1. In SXM main screen: Channel, Artist, Category and Song meta data shall be blank. Channel meta data shall be displayed as "Check Tuner".
